

Special Message to Parents/Guardians Whose Children are Diagnosed as Immunocompromised

July 14, 2021

Dear Cleveland Hill Parent/Guardian,

We are optimistic that we will be opening schools at full capacity this fall, and are currently staffing and preparing our buildings for a full five days a week in person learning. That said, updated guidance on reopening schools in September has still not yet been provided to us. In absence of that guidance, we are doing what we can to prepare for some of the possible requirements that may be included in it.

We are not anticipating offering a remote option for students next school year. However, we feel it prudent to be prepared to offer a remote learning option should we have immunocompromised students for whom we are required to provide such a setting. In preparing for this possibility, we are partnering with Erie 1 BOCES to provide this remote learning to our students. Students enrolled in this remote school setting would be taught by BOCES' teachers with other students from the area who also require this special accommodation.

If your child has been diagnosed by a doctor as having a compromised immune system, and that doctor believes that your child's return to a regular school setting poses a danger due to that condition, please contact our Health Center at 836-7200 ext. 8330 no later than Friday, July 23, 2021. If they are not available, please leave a message and they will call you back as soon as possible.

Please note that a written diagnosis of the condition, a doctor's note and contact information for that doctor will be required.

After we receive updated guidance from the state and understand its implications for reopening schools this fall, we will communicate that with you. We thank you again for your continued support and cooperation.

Best regards,

Mr. Jon MacSwan
Superintendent
